

Solar Energy Development

Programmatic Environmental Impact Statement

Scoping Comment Form

The U.S. Department of Energy and the Bureau of Land Management invite you to participate in the scoping process for development of a programmatic environmental impact statement (PEIS). The PEIS will focus on issues associated with facilitating development of solar energy projects in six western states through establishment of environmental policies and mitigation strategies.

The Public Scoping period is open from May 29, 2008 until July 15, 2008. You can submit comments via the project web site <http://solareis.anl.gov>, by folding and mailing in this form (postage is required), or by mailing other materials to the address provided on the other side of this form.

WITHHOLDING OF PERSONAL INFORMATION: Commenters should be aware that the entire comment - including personal identifying information (including address, phone number, and e mail address) - may be made publicly available at any time. While one can request in the comment that personal identifying information be withheld from public review, this cannot be guaranteed. If you wish the Agencies to withhold your name or street address from public view, you must check a "withhold" option below. The Agencies will honor such requests to the extent allowed by law. All comments from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be available for public inspection in their entirety.

- My name and address are provided for the public record (see below and return address on other side)
- Withhold my name and address from the public record
- Withhold only my address from the public record

Name: George E. GALVAN

Address: 14825 EL CAMINO Real, ATASCADERO, Ca 93422

Comments:

the Federal Government should be the leader in exploring new energy sources. Many BLM lands are well suited for passive solar farms, as well as wind turbines. These type of plants and machines are less harmful to the environment than most other sources. A large plain is an ideal area for solar and the mountain area to be like would be well suited for wind machines. I believe most residents in this area would be of this type of power. Thank you for coming to SANDHILL Obsps.
