It appears that BLM is trying to prevent or hold up the immediate development of alternative energy resources at a time when they are critically needed and investment and interest are at their peak. If millions of Americans have to suffer with loss of employment and lower standards of living what is the justification for waiting? It will only drive developers to use private land and in the end the government will have no control. There are pressures being brought to bear, I believe, that have interests other than those of the citizens of this country. I don't trust large government agencies anymore after the president has betrayed us and driven us into a recession without a thought to anything but his ego. I fear for our country. Why can't the upper echelon of the BLM and whoever is influencing them in this direction see that? Don't they know that their children will suffer the consequences of this bad decision? It's hopeless. I worked for two large regulatory agencies and they only see their narrow little regulations. This situation needs a hero. Too bad we don't have anyone.
