blm comment 1004-ad91

the scandal plagued us dept of interior is trying to put one over on the american public in this proposal. these major changes should wait for the new administration since we have seen the horror this administration has created. nobody trusts what emanates from sin city washington dc bureaucracy these days. it seems to be focused on helping everybody but american citizens.

i personally do not trust the agencies in washington dc which are focused on helping themselves to spoils and money and greed and the heck with the citizens of the us outside the beltway. it is clear our energy policy was created in secret closed meetings. what kind of democracy is that that dick cheney practices - certainly not one for the citizens of this country. God knows what giveaways happened in those kinds of secret meetings. certainly america is worse off now than it was before bush cheney.

america has not been in play as a democracy under this cheney administration. i do not want any rules proposed under this administration to be passed anymore. i oppose this proposal in full.

blm has been operating under a law of 1872 or so. this is not the time to change it. i do not want to provide more area for development or to ease operations since these operations have been totally destructive to anything God put here on earth.

\*\*\*\*\*

it is also clear that the united states should be the country of international address. those who come from other countries should have to scroll to find the right country. you are putting american citizens through a lot with this stupidly designed form.
