I think all solar project need to have priority installation over, above and beyond any project. It is vital to our national security in this day of uncertainty in the fossil fuel and energy market. We have procrastinated long enough! We HAVE to get moving on alternative energy sources like solar power QUICKLY! Nearly all the oil belongs to hostile countries, anything can happen. Our economy, food supply our whole country absolutely depends on energy. Why postpone a source of limitless energy and weaken our dollar that much more???? Hell, offer incentives to put solar power station on gov't land. When will the gov't cease to be a stick in the spokes of the wheels of progress. Wake Up!!!
