Hello,

Though I write to you as an individual, there are endless numbers of concerned US citizens who demand integrity, ethics and balance in our government's actions. While I do believe in the importance of a detailed EIS for large-scale solar implementation, it cannot be done with a complete moratorium for the next few years. Our civilization and our planet cannot stand idly by while we allow ourselves to choke our own environment and economy with endless streams of greenhouse gas. Solar plants can be built with the hindsight of environmental impact gained through the construction of conventional plants over the last few decades. It is imperative that some of the projects to be placed in moratorium be allowed to take those lessons in stride and move forward securing our sovereignty, economic viability and safety. Our country has had infinite opportunities to redeem itself for the tremendous damage we have done to this planet and humanity. We have squandered those chances and now are at the very edge of an abyssal spiral. Do not be the ones responsible for our collapse...the world, and myself, beg of you.

Sincerely,
