We are blessed in this state to be able to provide all our energy needs via the renewables of solar, wind and geothermal. Let's put our heads together and create a renewable portfolio that will supply all our energy needs with extra to spare and share without pollution, environmental damage or work safety dangers. Solar, especially, will be a huge boon to our environment, energy needs and economy. It provides us with huge potential; let's embrace this opportunity and lead the way into an oil/coal free future for our country's energy independence and security.
Thank you kindly for your consideration! Kristina
