To Whom it may concern,

My husband and I have been in Off Road Racing for over 30 years. It is not only our passion it is also our business. Over the last 30 years we have watched while the government has continually taken more and more land away from the people that enjoy going out to the desert.

It seems that "He who screams the loudest" gets heard. I think "We" ( the off road community) have sat back silently and watched as our desert and livelihood continue to get taken from us. With every turn we are penalized, pushed out and treated as though we ( Off Road community) don't matter.

I for one as well as several thousands of others believe it is our time to step up and say "We the People" of this great country should have our say. We continue to run the same courses so as not to impact the environment, But that area gets smaller every year. PLEASE listen to the people that are writing you and calling. We want not only to keep our business going but we want OUR Rights as TAX PAYING citizens to be heard. Please reconsider taking the Land in and around the PRIMM Valley area from us. We bring many people ( Every year to just one of the races We alone reserve 35 rooms) . This brings revenue to the Hotels, gas stations, stores etc. to this area. We are only one of several hundreds of teams. In these uncertain times I think you would like to take a step back and think for once of all the people you are directly effecting when you decide to take away the very rights of the American Off Road community.

While I know the great need for new energy ideas I have flown over this country many times and can attest to the VAST amount of unused land. Please help find in our favor for once.

Thank You,

Cari Penhall
