To Whom It May Concern:

I live in California and frequently make a drive to the Primm Nevada desert area to participate in off road desert races. As a racer this hobby that myself and entire family have been doing for decades. By shutting down this land you are not only shutting thousands of ohv acres but you are shutting down a large portion of a track that more than five organizations use a year. There already have been many land closures in the area in which these panels could be placed. It is my best interest to do what is right for the earth but I do not believe that shutting down the acres of land in the Primm Valley area is necessary.

Please keep all parties in mind before a final decision is made. Closing down this PUBLIC land will change my life and many others for decades to come.

Thank you.
