It is irresponsible to place your solar project in land already earmarked, at great taxpayer expense, for OHV use. This segment of the recreational market is forced out of many areas and authorities across the county are trying to keep these vehicles out of areas where they are outlawed. The answer is to direct them to areas where they are allowed, not to close areas where they are allowed. Put the solar project on the Nevada Test Site or elsewhere in the Nevada-California desert. Also a better job should have been done announcing this project to those interested in BLM land use.
