I strongly oppose this proposal! I am an avid outdoor enthusiast and love to ride my dirt bike and share outdoor recreation with my family. The loss of public lands for public recreation must be stopped. I see nothing wrong with the use of solar energy in a time when we should be looking for alternatives, but these panels can be installed in locations that do not obstruct and close off valuable public recreation lands. What is wrong with installing them on steep hillsides that are not good for anything else? If this horrible idea is seriously entertained, the BLM must create an equal number of acres for OHV recreation to what is lost. This area would be in addition to any areas currently under construction and must be relatively close to the Las Vegas area. Thanks for your time on this important issue, Nate Delaney
