why is that everytime someone want to build or take lands it is from our recreation sites. i have been using that land for many years, my family has had thanksgiving dinner on the dry lake bed for as long as i could remember. it is one of the last places in the valley that we can still use after land closers all over the valley. why take this land from us. i understand that solar energy is our future with the given energy crisis that we are in. we all have to do our part. but there is a point when we have to say enough.. where will it end. there is plenty of open space that is not being used for recreation why not explore the pharump valley or indian springs area..
