Comment Submitted:

As a lifelong off-road enthusiast, Motocross Track owner and an Off-Road magazine Editor, I am asking that it is strongly considered that if OHV areas are closed down due to solar energy panels, That an additional equal sized area is opened up for OHV use in the Las Vegas area. Las Vegas regional OHV areas are slowly being taken from enthusiasts and this would be a huge loss for the off-road community. We understand the reasoning behind the land closure and support "green' energy sources, we do however expect to be provided with alternative areas of equal or greater sizes to support the growing Off-Road enthusiast populations of the Las Vegas area. I have attached a recent magazine cover of "Vegas Dirtlife" that represents the local Off-Road community that would be affected by the closure of the areas. I can be reached at 702-218-9884 for any questions and comments. Please consider this when making decisions. Thank You. [See Attachment.](#)
